DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1,2,4,13,17,18,20,40,41,45,49,50,52, and 54 are rejected under 35 U.S.C. 102(e) as being anticipated by Vander Voort.

Art Unit: 3724

a. Vander Voort discloses an apparatus for polishing one or more layers of a semiconductor device structure, comprising: a polishing pad(70); a subpad support(10) located adjacent the polishing pad, the subpad support including a subpad retention element(25); and a subpad(80) removably secured to the subpad support by way of the subpad retention element, the subpad being located between the subpad support and the polishing pad. Note, the subpad retention element(25) prevents the subpad(80) from being removed laterally of the subpad support(10) (see column 6, lines 18-25).

b. Regarding claim 2, the polishing pad is made from cloth, which may inherently be a web format.

c. Regarding claims 13 and 45, a bottom surface of the subpad(80) is substantially free of adhesive material.

d. Regarding claims 4,20,41, and 54, the subpad retention element comprises magnetic attraction which is negative pressure applicable to a bottom surface of the subpad through the subpad support.

Allowable Subject Matter

3. Claims 6-12,14-16,22,23,43,44,46-48, and 53 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Art Unit: 3724

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
